Luncheon: The Importance of Balancing Air and Water Systems

Norris Conference Center

2525 W. Anderson Lane

Austin, TX 78759

11:30 AM - 01:00 PM CST

This presentation will delve into why balancing is essential, how to recognize when it's needed, examples of situations requiring balancing, understanding balance reports, selecting the right professionals for the job, estimated time and fees, and tools used for balancing. Here is a list of items to be covered during this presentation:

What is balancing (air and water) and why is it important?

How to know when you need balancing.

Examples of situations when balancing is needed (New Construction, renovations, seasonal, comfort balancing, etc.)

How to read a balance report

Who should do your balancing? (Internal vs External)

Estimated time and fees associated

Tools used to balance

Presented by:

Joe Castanon, Project Manager with Centex Air & NCI Certified Supervisor
